

Orthopedic Surgery	Year 1	Year 2	Year 3
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. Perform and interpret the findings of a thorough problem-focused history and physical exam, including: problem-focused history.			
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. Perform and interpret the findings of a thorough problem-focused history and physical exam, including: neurologic examination.			
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. Perform and interpret the findings of a thorough problem-focused history and physical exam, including: vascular examination.			
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. Perform and interpret the findings of a thorough problem-focused history and physical exam, including: dermatologic examination.			
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. Perform and interpret the findings of a thorough problem-focused history and physical exam, including: musculoskeletal examination.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: plain radiography.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: radiographic contrast studies			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: stress radiography.			

Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: fluoroscopy.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: nuclear medicine imaging.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: MRI.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: medical imaging, including: CT.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: laboratory tests, including: hematology.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: laboratory tests, including: serology/immunology.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: laboratory tests, including: blood chemistries.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: laboratory tests, including: coagulation studies.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: laboratory tests, including: microbiology.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: laboratory tests, including: synovial fluid analysis.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: laboratory tests, including: urinalysis.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: pathology, including: anatomic and cellular pathology.			
Perform (and/or order) and interpret appropriate diagnostic studies, including: other diagnostic studies, including: compartment pressure studies.			
Prevent, diagnose, and manage diseases, disorders, and injuries of the pediatric and adult lower extremity by nonsurgical (educational, medical, physical, biomechanical) and surgical means. Formulate an appropriate diagnosis and/or differential diagnosis.			
appropriate non-surgical management when indicated, including: closed management of fractures and			

dislocations: closed management of pedal fractures and dislocations.			
appropriate non-surgical management when indicated, including: closed management of fractures and dislocations: closed management of ankle fracture/dislocation.			
Formulate and implement an appropriate plan of management, including: appropriate non-surgical management when indicated, including: cast management.			
appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: NSAIDs.			
appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: narcotic analgesics.			
appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: muscle relaxants.			
appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: sedative/hypnotics.			
appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: anticoagulants.			
appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: laxatives/cathartics.			
appropriate non-surgical management when indicated, including: pharmacologic management, including the use of: fluid and electrolyte agents			
Formulate and implement an appropriate plan of management, including: appropriate surgical management when indicated, including: digital surgery.			
Formulate and implement an appropriate plan of management, including: appropriate surgical management when indicated, including: first ray surgery.			
Formulate and implement an appropriate plan of management, including: appropriate surgical management when indicated, including: other soft tissue foot surgery.			
Formulate and implement an appropriate plan of management, including: appropriate surgical management when indicated, including: other osseous foot surgery (distal to the tarsometatarsal joints,			

except where specifically indicated).			
Formulate and implement an appropriate plan of management, including: appropriate surgical management when indicated, including: reconstructive rearfoot and ankle surgery.			
Assess and manage the patient's general medical status. Perform and interpret the findings of a comprehensive medical history and physical examination (including preoperative history and physical examination), including: comprehensive medical history.			
Perform and interpret the findings of a comprehensive medical history and physical examination (including preoperative history and physical examination), including: comprehensive physical examination, including: vital signs.			
comprehensive physical examination, including: physical examination, including: head, eyes, ears, nose, and throat (HEENT).			
comprehensive physical examination, including: physical examination, including: neck.			
comprehensive physical examination, including: physical examination, including: chest/breast.			
comprehensive physical examination, including: physical examination, including: heart.			
comprehensive physical examination, including: physical examination, including: lungs.			
comprehensive physical examination, including: physical examination, including: abdomen.			
comprehensive physical examination, including: physical examination, including: genitourinary.			
comprehensive physical examination, including: physical examination, including: rectal.			
comprehensive physical examination, including: physical examination, including: upper extremities.			
comprehensive physical examination, including: physical examination, including: neurologic examination.			
Assess and manage the patient's general medical status. Formulate an appropriate differential diagnosis of the patient's general medical problem(s), which includes diagnoses in the following tabular ICD-9 subsections (Please refer to Index A for complete listing of appropriate diagnoses).			
Assess and manage the patient's general medical status. Recognize the need for (and/or orders) additional diagnostic studies, when indicated, including: EKG.			

Recognize the need for (and/or orders) additional diagnostic studies, when indicated, including: medical imaging, including: plain radiography.			
Recognize the need for (and/or orders) additional diagnostic studies, when indicated, including: medical imaging, including: nuclear medicine imaging.			
Recognize the need for (and/or orders) additional diagnostic studies, when indicated, including: medical imaging, including: MRI.			
Recognize the need for (and/or orders) additional diagnostic studies, when indicated, including: medical imaging, including: CT.			
Assess and manage the patient's general medical status. Formulate and implement an appropriate plan of management, when indicated, including: appropriate therapeutic intervention.			
Practice with professionalism, compassion, and concern, in a legal, ethical, and moral fashion. Practices and abides by the principles of informed consent.			
Practice with professionalism, compassion, and concern, in a legal, ethical, and moral fashion. Understand and respects the ethical boundaries of interactions with patients, colleagues and employees.			
Practice with professionalism, compassion, and concern, in a legal, ethical, and moral fashion. Demonstrates professional humanistic qualities.			
Practice with professionalism, compassion, and concern, in a legal, ethical, and moral fashion. Demonstrates ability to formulate a methodical and comprehensive treatment plan with appreciation of health care costs.			
Demonstrate the ability to communicate effectively and function in a multi-disciplinary setting. Communicate in oral and written form with patients, colleagues, payers and the public.			
Demonstrate the ability to communicate effectively and function in a multidisciplinary setting. Is able to partner with health care managers and health care providers to assess, coordinate and improve health care.			
Demonstrate the ability to communicate effectively and function in a multidisciplinary setting. Maintains appropriate medical records.			
Has the capacity to manage a podiatric practice in a multitude of health care delivery settings. Understands medical-legal considerations involving health care delivery.			

Be professionally inquisitive, lifelong learners and teachers utilizing research, scholarly activity and information technologies to enhance professional knowledge and clinical practice. Reads, interprets, critically examines, and presents medical and scientific literature.
